

AP Chemistry
Summer work:

1. Read the first 3 chapters from the free summer only online textbook and answer the reading questions assigned from each chapter. Each Chapter has a separate set of questions to answer.

2. You should also complete several chapter problems from your “Chemistry, Ninth Edition, AP Edition, Zumdahl and Zumdahl, copyright 2014” textbook (ISBN-13: 978-1-113-61110-3). The concepts covered in online text chapters do not line up exactly with the problem sets. Scanned copies of the problem sets are posted on Edmodo so you may start this work before receiving your class textbook. Please send me an email request if you are not in that group so I may get you the code to join.
