

Dear Future Algebra I Students,

I'm excited to welcome you to Algebra I this fall—and believe it or not, August will be here before we know it!

While summer is a great time to relax and recharge, it also helps to stay connected to the math skills you've already built. Think of this summer assignment as a light workout for your brain—designed to get you ready for a strong start to the school year. No stress, just steady practice.

Here's what you need to know:

- The assignment is short, focused, and should be completed without a calculator.
- All work must be your own.
- If you get stuck, feel free to look up tutorials on Khan Academy or YouTube. A quick refresher can go a long way!
- Plan ahead. You'll want to give yourself time to complete it thoughtfully.

 **Due Date:** *Wednesday, August 20th at 8:20 AM, our first day of school. This will be your first grade of the year.*

 **1st Quiz:** *Friday, August 22nd over math facts from 1-12, this is a 3-minute timed test*

About the Summer Assignment on Delta Math

There are **three separate assignments** posted in Delta Math. Here's what you'll find:

1. **REQUIRED** – This is the main assignment that every student must complete before the first day of school.
2. **Honors Challenge (Optional)** – For students interested in pushing themselves or possibly preparing for Honors Algebra.
3. **Skill Refresher (Optional)** – A helpful review for anyone who wants extra practice or a confidence boost before school starts.

Each assignment is clearly labeled in Delta Math so you'll know which is which. You may complete the optional assignments if they apply to you or if you're simply up for the challenge!

I'm looking forward to getting to know you and diving into Algebra together. Until then, enjoy your summer—and don't forget to stretch those math muscles a little bit along the way.

See you in August!

Mrs. Wiedwald

(See the next page for Delta Math instructions.)

✓ How to Access Your Delta Math Assignment:

If you're **new to Delta Math**:

1. Go to [this link](#).
2. Click “Register with Email” and use your **BMHS email address**.
3. Click “Check Email” and follow the steps to verify and create your account.
4. Be sure to use your **legal first and last name**.
5. Write down your password—you’ll use it throughout the year.
6. Once registered, log in and start working on your summer assignment.

If you **already have a Delta Math account**:

1. Use [this same link](#).
2. Log in and make sure your email is updated to your **BMHS email**:
 - Go to Tools → Login/School Info → Personal/Login Info → Edit Email
 - Save your changes and verify your email if prompted.
3. Begin your summer work.

If you're **already using your BMHS email** and know your login:

- Simply follow the link and log in—either with Google or your existing password.
-
